

AND THERE'S NO APPROACH LIKE OURS.

Introducing our 2-Phase design process powered by blended collaboration to program your remodel.

PHASE

1

PROJECT PROGRAMING

We start slow and deliberate and in a particular order. Our first meeting is all about the scope, identifying the issues to be addressed. In the days and weeks ahead we program in more details, like adding ingredients for a recipe:

- ▶ Better understand your goals through a needs analysis
- ▶ Explore creative options to help achieve your goals
- ▶ Develop concept plans so you can visualize the solutions
- ▶ Value engineer and develop pricing to confirm affordability

PHASE

2

PROJECT DEVELOPMENT

Speed and momentum builds as the fun part of trading dreams for reality unfolds. Together we are developing, selecting and finalizing down to the smallest details:

- ▶ Develop understandable detailed drawings and 3-D images
- ▶ Help you finalize all material selections, style and colors
- ▶ Double check all aspects of the remodel via a in-home team meeting
- ▶ Finalize budget with a "no surprises" Building Agreement

Done right, remodeling is by its nature difficult and complex. It is our job to navigate it all and make it appear easy. And that's why we've created this unique approach. Learn more here...

THERE'S NO PLACE LIKE ^{your} HOME.

Good thing too, because for most, it still makes more sense to stay and improve than to move.

AND THERE'S NO ONE LIKE US.

Murphy Bros. is a family owned and operated, full-service residential remodeling company. As a design/build firm, we build what we design with our clients, be it an aging-in-place bathroom, open concept kitchen, 3 or 4 season porch, mudroom, basement, whole house renovation or a custom new home. We also have a residential painting division and a Home Services Division for past clients.

Our purpose is to improve the lives of our clients.

We make things better not just different. We treat every design as unique, not as a "copy & paste." Anyone can do "different." Few can do "better." And with our proprietary design process remodels always end in success.

We treat homeowners like we want to be treated. Golden rule? Pretty much, but a bit more than that. It's about empathy. We've done our own remodels. We know the stress and anxiety. We've walked in your shoes.

We have deep and accountable talent. Most design/build firms have a few skilled people and sub out the rest. We do the opposite because we have more than 50 full-time employees—our own carpenters, project managers, designers, drafts-people, and painters to do the work to our standards.

Trust is everything. Without it nothing of lasting value can be accomplished. And that is why one of our four values is "Uncommon Integrity". It means doing the right thing whether it is profitable or not, whether someone is watching or not, whether it is popular or not.

Mbros. Values Video

At 42 years and counting we have won the BBB's Torch Award for Ethics in Business twice and our client satisfaction rating in 2024 reached 95%. And yes, we measure that every single day.
