

INSURANCE PLUS RESTORATION

OUR 5-STEP PROCESS

Restoring your home from a disaster should not be that much different than a remodel. And now you have the perfect opportunity to make your home even better than before.

1 Define your restoration and improvement goals in a simple Design Agreement.

2 Follow this dual-track process:

- Work with adjuster to agree on scope of work related to claim
- Review adjuster's estimate or we will prepare an XACTIMATE estimate for adjuster.
- Agree on repair cost with insurance carrier

AND THEN...

- Perform on site measure to develop existing plans
- Develop initial concept plans
- Produce a general scope of work to go with initial concept plans
- Determine a budget range plan & scope

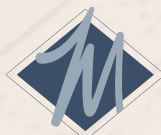

3 Review the total insurance repair proceeds and contrast this with the preliminary proposed budget range.

4 Develop a full Construction Agreement that includes buildable plans, specifications, product selections and specific price.

5 Deliver the project and transform your home!
